Education

Stanford University

Expected graduation date: Jun. 2027

M.S. in Management Science and Engineering | [Link to all courses](#)

GPA: NA/4.0

Courses: Convex Optimization, Incentives and Algorithms, Mechanism Design, Causal Inference, Machine Learning

Stanford University

Expected graduation date: Jun. 2026

B.S. in Economics | [Link to all courses](#)

GPA: 3.7/4.0

Courses: Advanced Econometrics, Linear Algebra and Multivariable Calculus, Macro and Micro Economic Analysis, Data Science for Economic Decisions, Probability Theory, Mathematical Foundations of Computing, Market Design, Programming Methodologies/Abstractions, Game Theory, Analysis of Variance and Regressions

Employment

Stanford Institute for Human-Centered AI: Digital Economy Lab

May. 2025 - Present

Research Intern

Pandas, SKLearn, JavaScript, SQL, Machine Learning, NLP, Praw, Web Scraping

- Webscraped and leveraged PRAW to get data on over 45,000 Reddit comments and accounts to reverse engineering an XGBoost bot detection algorithm used on over 2 million accounts
- Employed NLP analysis on around 7 million Reddit comments and replies using TopicBERT word embeddings and manual clustering
- Analyzed data from over 243 million comments to train content ordering models to optimize for user engagement

Stanford Institute For Economic Policy Research

Jan. 2024 - June 2025

King Center Research Fellow

R, Python, Stata, LaTeX, Machine Learning

- Lead the econometric analysis of supply chain effects of an informational treatment trial on more than 800 sub-Saharan African agricultural traders and their suppliers, accounting for over 1000 variables in labor and market conditions
- Exploratory data analysis on climate-market data with over 1,000,000 observations of pricing, climate, and spatial data
- Employed various econometric techniques (DiD, pricing models, ect) and Machine Learning models (fBISG, logit, ect), worked with census surname datasets and spatial data spanning from city-wide, census block-group level, to precinct

Activities

Reso

May. 2024 - June 2025

Founder/Full Stack Developer

Python, Javascript, React Native Framework, NLP, SQL

- Designed movie recommendation algorithm leveraging NLP to efficiently source appropriate movies from a database of over 10,000,000, created and managed a user database, servers, designed and implemented UI

Leadership and Volunteering

Vice President of Associated Students of Stanford University

May 2025 - Present

Stanford's Student Body Government

- Elected as the Vice President of the Student Body Government of Stanford University, representing over 18,000
- Oversee the Undergraduate Senate and the Graduate Student Council

President of the Interfraternity Council (IFC)

Dec. 2024 - Dec. 2025

- Coordinating and negotiating with Stanford administration on behalf on the FSL community
- proposing administrative legislation, upholding standards of over 5 organizations and hundreds of members, and supervising logistically intensive periods such as fraternity rush

Habla: On-Campus ESL Organization

Nov. 2022 - Jun. 2025

Director of Community Outreach

- Orchestrating the advertisement and logistics of 100+ ESL coach and learner recruitment events

Honors

Questbridge Scholar, Rensselaer Medal in Math and Science, 2024 Donald C. Dilley Jr. Scholarship Recipient

Skills/Interests

Skills:

Python, Javascript, C++, R, Stata, Tableau, Excel, strong writer, Math, Data Analysis/Econometrics, Spanish

Interests:

Machine Learning, Auction Theory and Market Design Literature, mobile app development, Art Literature
